Whether it is setting up your router for the first time, you need to re-setup or manage your network, simply run this application to save your time and effort. The application also allows you to edit the router settings manually by using the interface provided by the application. The set of features of the application are as follows: 1. Network Information Network Configuration Information is available under a tab. It provides data about the current network setting, including IP address, WAN IP, LAN IP, Default Gateway, etc. 2. AP setting AP tab provide information about your wireless devices. You can check their name, signal strength, AP settings, etc. Address Bar This is the main interface of the AP settings, to set up the wireless access points, as well as the names of your wireless devices. 3. Gateway This tab consists of your default gateway settings, such as IP address, netmask and DNS server. This will be the place where your modem sends you to the internet. 4. DNS This tab consists of your DNS settings. It is in the form of a table and will provide you all DNS servers for you to choose. You can keep all DNS servers at the default settings or remove some and add some of your own. 5. The Connection for the computer is now set up. To use the internet, the modem needs to be powered up and connected to the main power supply. 6. If the settings are correct, the modem will power up and start to make the connection to the modem itself. 7. If there is not a connection made, the modem will stop. After that, you should go back to step 7. and check the settings again. Hey! I recently got this Wireless N Router and ADSL 2+ Modem Router. But I cant seem to access the wireless. There is no way for me to connect to other computers in the vicinity. Any suggestions? What should I do to fix this? Thanks. My Internet is connected to a TD-W9601G Router, the router has only the 3G function enabled. I think it cannot detect that I have the 4G function on my Smartphone, is there any way for me to connect the Internet to the router? Thanks. b7e8fdf5c8

You know the answer to the first two questions, but for the latter two, you're left to wonder. The simple answer is no, James Wilson is not in a relationship, and he's not dating anyone. Wilson shared the news in a blog post titled "OMG my job is over!" The prideful Canadian realtor was celebrating the end of his many years at McAllister Real Estate in Blaine, WA. "It has been an amazing 11 years, and I am very humbled to have accomplished what I have," Wilson wrote. "Not that any of this was easy or that I don't still have plenty to do, but there are so many people that have helped me with this." As for relationships, Wilson's relationship status is "single." "As of today, I am done with dating. With my very own words I said, 'No thanks!' That means that on all social media, even the dating sites that claim to be for 'getting to know you better,' you will not see me," he wrote. "With my free time, I'm focused on the kids, my kid sisters, my wife, and my dog," he told Bella Fine, wife of Jacob Fine, one of Wilson's "subaru teammates,
